DYNAMIC EARTH
Construction: Sliced Face Engineered • Specie: White Oak
Texture: Hand Sculpted • Edge Profile: Beveled • Sheen: Matte • Dimensions: 7” Wide x RL Up to 8’ Long x 1/2” Thick
Packaging: 23.33 square feet / box • Protective Finish: Scratch Resistant Aluminum Oxide • Installation: Glue, Staple or Float, Approved Over Radiant Heat • Grade Level: On, Above, Below • Warranty: 35 year residential, 5 year commercial

CONTROLLED CHAOS
Construction: Sliced Face Engineered • Specie: White Oak
• Texture: Brushed • Edge Profile: Beveled • Sheen: Matte • Dimensions: 7” Wide x RL Up to 8’ Long x 1/2” Thick
• Packaging: 23.33 square feet / box • Protective Finish: Scratch Resistant Aluminum Oxide • Installation: Glue, Staple or Float, Approved Over Radiant Heat • Grade Level: On, Above, Below • Warranty: 35 year residential, 5 year commercial

TALL TIMBERS
Construction: Sliced Face Engineered • Specie: Hickory
• Texture: Hand Sculpted • Edge Profile: Beveled • Sheen: Matte • Dimensions: 7” Wide x RL Up to 8’ Long x 1/2” Thick
• Packaging: 23.33 square feet / box • Protective Finish: Scratch Resistant Aluminum Oxide • Installation: Glue, Staple or Float, Approved Over Radiant Heat • Grade Level: On, Above, Below • Warranty: 35 year residential, 5 year commercial

AU NATURELLE
Construction: Sliced Face Engineered • Specie: White Oak
• Texture: Brushed • Edge Profile: Beveled • Sheen: Matte • Dimensions: 7” Wide x RL Up to 8’ Long x 1/2” Thick
• Packaging: 23.33 square feet / box • Protective Finish: Scratch Resistant Aluminum Oxide • Installation: Glue, Staple or Float, Approved Over Radiant Heat • Grade Level: On, Above, Below • Warranty: 35 year residential, 5 year commercial

TENNESSEE TRAILS
Construction: 5 Ply Engineered Hardwood • Specie: Varied
Texture: Brushed • Edge Profile: Beveled • Sheen: Matte Dimensions: 6.5” Wide x RL Up to 8’ Long x 1/2” Thick
Packaging: 21.6 square feet / box • Protective Finish: Scratch Resistant Aluminum Oxide • Installation: Glue, Staple or Float
Grade Level: On, Above, Below • Warranty: 35 year residential, 5 year commercial
Inspired by Nature

- A fresh, diverse, and thoughtful collection featuring a variety of styles and colors that range from traditional to contemporary.
- Scraped textures are hand crafted in a modern new style to create color movement and texture without a dated “channled” look.
- 100% all American hardwood construction: 5 ply, sliced faced White Oak and Hickory.
- Dynamic color shifts in some collections mimic look of reactive and thermally treated wood, but are achieved using low emitting, water-based stains for products that are healthy and consistent from run to run.
- 50% less seams than competitive wood floors, creating clean lines and a modern feel.
- 3/4” thick x 7” wide x up to 8’ long; large format matches the scale of open floor plans.
- Flexible installation: glue, staple, float; on all grade levels; approved for radiant heat.

Manufacturing Excellence

- Vertically Integrated - From plywood to packaging, we make everything in our plant outside of Nashville, TN - including samples.
- Press plywood in house for maximum control over quality and performance.
- Use all hardwood construction and oak backers for optimal dimensional stability in large format planks.
- Precision milling makes planks install quickly and easily - up to 5 square feet per plank!
- Complex designs are achieved through multiple steps in production and are truly crafted by hand so no two boards are alike.
- State-of-the-art manufacturing plant features the longest finishing line in the world.

Performance

- Proprietary finish features 2 coats of Aluminum Oxide for maximum scratch, stain, fade and wear resistance.
- Innovative additive creates flexibility in the finish to prevent checking in arid climates.
- Retains clarity even at low luster and with added Aluminum Oxide particle. Recreates look of unfinished or truly reclaimed wood.
- Ultra-low gloss gives the richness of oil finishes without sacrificing the performance and maintenance benefits of Aluminum Oxide Urethane.
- 80% less seams than competitive wood floors, creating clean lines and a modern feel.
- 5/8” thick x 7” wide x up to 8’ long; large format matches the scale of open floor plans.
- Flexible installation: glue, staple, float; on all grade levels; approved for radiant heat.

Above: Many Hearthwood floors are created by layering water-based stains for a dynamic look.
Right: Aluminum Oxide used in our finish is the second hardest element under diamonds.
Above Right: All scraped styles are sculpted truly by hand for an authentic look.

Above: Working with the Gary Sinise Foundation, we provide wood floors for smart homes awarded to severely wounded veterans and their families.

Above: Honored to partner with NWFA in providing wood floors for the smart homes built by the Gary Sinise RISE program, which are awarded to our country’s severely wounded heroes.
